

④

For any device to reach another on the Internet, it needs a unique identifier a name (like icann.org) or a number / IP address (like 192.0.43.7).

What is Universal Acceptance?

②

A	B	C	D	E	F	G	H	I	
J	K	L	M	N	O	P	Q	R	
S	T	U	V	W	X	Y	Z		

The Internet Corporation for Assigned Names & Numbers (ICANN) community develops policies that allow these identifiers to work well.

③

- Build new / update existing
- Application Programming Interfaces (APIs)
- Email Address Internationalization (EAI)
- For user@test.org to have same acceptance as user@server.tech or user@live.in@gmail
- PS: These are not real email illustrations.

We have a GitHub repo...

<https://github.com/Universal-Acceptance-for-You/>

Achieving UA requires a

multistakeholder approach.

The stakeholders shown in the diagram are:

- Tech companies
- web developers
- Software developers
- UASG
- users
- Governments
- policy
- end IDN
- open data community
- gTLD
- stakeholders
- email operators
- media
- academia
- private sector
- ICANN
- EAI
- activists
- advocacy
- UA
- Research
- tech enthusiasts
- registrants
- registrars
- language experts
- API
- trainers
- ccTLD
- Internet

kle are playing our part...
so should you!
